Interface Industrial Computers are tough enough to withstand high altitude, hot deserts and scorching heat. Applications include weather radar systems, rain gauge monitoring, and desert condition monitoring systems.

Interface Industrial Computers are designed for harsh outdoor conditions such as extreme low temperature. Applications include rail track monitoring systems and highway monitoring system.

Energy Efficient Models

Intel Atom E3845 Models
[Click here for more information.](#)

- Ultra small, compact and rugged
- Operating temperature range: -30°C to +70°C
- No moving parts: fanless and diskless
- DC power input range: +7V to +37V
- Front access models available

Vehicle Mounted Models

Intel Atom E3845 (Bay Trail) Models

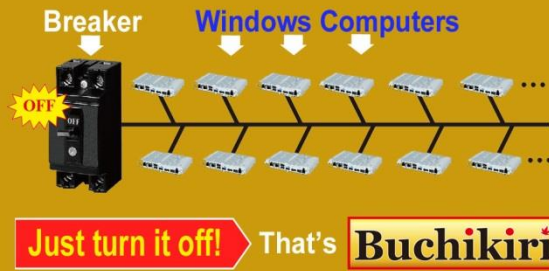

[Click here for more information.](#)

- Operating temperature range: -30°C to +70°C
- CAN interface port
- No moving parts: fanless and diskless
- DC power input range: +7V to +37V
- Quick Boot

Buchikiri

No shutdown needed.
Just unplug it. It's done.

Buchikiri is a function that safely turns off a Windows PC without shutting down. This feature is only available on Interface computers.

[Click here for more information.](#)

With the **Buchikiri** function, you can safely turn off hundreds of Windows PCs by just turning off the breaker in your workplace. When the breaker is turned back on, the computers will automatically reboot.

Interface Amita Modules

Long-Term Supply Interface Modules

[Click here for more information.](#)

Interface manufactures several hundred different types of interface modules; this provides the ability to customize our standard products to your specific requirements.

We also offer small to mid-volume, high-mix model productions. We can meet the need for small quantity prototypes and early stage test run products. We are available to help and provide you with solutions that will fit the specifications for your applications.
