

New Product!

CAN/CAN FD PCI-Express Board

PEX-H485940P is a new addition to the PCIe-H (PEX-H series) Interface board product line. After the introduction of PCIe-H, Interface has been adding new products to PCIe-H (PEX-H series). PEX-H485940P is an individually-isolated, 4-channel high-speed CAN/CAN FD product with 64-message FIFO for PCI Express-based computers.

Features

- CAN2.0B/CAN FD Protocol, ISO11898-2 compliant
- DMA transfer
- Large-capacity FIFO buffer
- One CAN controller for each channel
- High-performance CAN controller
- Message transmission interval
- Individual channel isolation
- Cyclic multi-messaging
- CAN bus monitoring
