

New Ultra Small Industrial Computer

"SuperCD"

Interface's "SuperCD" is ultra-small, robust and designed for wide temperature range operation. It is highly reliable for any application, anywhere.

Features

- Intel Atom E3845 (Bay Trail) 1.91 GHz model
- OS selections
 - Windows Embedded STD7 (64bit)
 - Windows 10 IoT Enterprise 2016 LTSB (64bit)
 - Interface Linux System 7 (64bit)
- Ultra Small Size: 122 (w) x 93 (d) x 41 (h) [mm]
- PoE (Power over Ethernet) PD (Powered Device) model for IoT network
- Wide operating temperature: -30°C to +50°C
- Long-term Supply & Service
- Buchikiri Function*

<p>Buchikiri Function*</p> 	<p>Interface's unique feature "Buchikiri"</p> <p>Buchiki is the function that safely turns off Windows PC without shutting down. The system can be turned off without performing a normal shutting down process, preventing data from being written to the boot device.</p> <p>Interface computers with "Buchikiri" function can be turned off by simply unplugging or turning off the main power breaker. It will not cause any damage to the system or the data.</p>
